

ABNOUS

trading company

Abnous Company is one of the reputable and well-known companies in the field of producing and processing various types of natural syrups in Iran. The company started its operations with the aim of offering high-quality and healthy products to the market, and it has quickly gained a special place in the food industry. Founded in recent years, the Abnous brand has leveraged Iran's rich history in producing natural products, particularly syrups, to offer a variety of products to the market by utilizing modern technologies and the technical knowledge of experts.

Production Process

Abnous Company uses modern and hygienic methods to handle the stages of harvesting, processing, and packaging syrups:

- Selection of raw materials: The best fruits and dates are chosen from reputable orchards and palm groves.
- Processing: The extraction of syrup is done while preserving the nutritional properties and natural taste of the products.
- Packaging: The products are packaged using the most up-to-date equipment and methods.

In today's world, the consumption of refined sugar and sweeteners in the food industry has significantly decreased, and the use of products such as natural syrups has gained many supporters. Syrups are nutritious and delicious food products made from various fruits. These products are not only used as natural sweeteners but also have many therapeutic and nutritional benefits. The Abnous production and trading group proudly offers a variety of natural syrups, including date syrup, grape syrup, mulberry syrup, fig syrup, and natural honey, with the best possible quality for its customers around the world in desired quantities.

Products

The company's products include various types of natural syrups, detailed as follows:

- Date Syrup: A thick, dark-colored, and sweet syrup naturally extracted from high-quality dates without additives, recognized as a nutritious and natural sweetener. This popular and nutritious product from the Abnous brand is rich in vitamins, minerals, and antioxidants.

•Grape Syrup: Known as "Doshab" in the market, this syrup is made from the best varieties of grapes and raisins using completely natural methods and offers numerous health benefits.

•Fig Syrup: This syrup is made from ripe and fresh figs and is packed with medicinal and nutritional properties. Fig syrup is known as a rich source of fiber, vitamins, and minerals, offering benefits for overall body health and vitality.

•Mulberry Syrup: A thick, flavorful, and dark-colored syrup generally extracted from fresh white mulberries with a unique taste. Since this product is naturally made without additives, it retains the original benefits of mulberries and is rich in antioxidants and nutrients.

•Natural Honey: This sweet natural substance produced from flowers has long been recognized as one of nature's miracles. It comes in various types, each with unique properties due to the different flowers used in its production. The Abnous brand offers a variety of high-quality and organic honey in special packaging and at competitive prices.

Abnous brand strives to guarantee the high quality of all its products. To achieve this, the company selects completely organic products and employs skilled individuals to choose and provide the highest quality items to customers both inside and outside the country.

The experienced Abnous team, utilizing the latest equipment and methods, offers all of its products in a variety of packaging—generally in two types: small packages and bulk packaging—to suit the target market and the needs of its customers, at competitive prices worldwide.
